ABOUT ZAKAY GLASS CREATIONS

Enhance your living space with our latest range of Geometrica Glass Sculptures

Geometrica Glass Sculptures designed and manufactured by Zakay Glass Creations, located in Byron Bay, Australia.

The Geometrica series of glass sculptures, shown throughout this catalogue, are the result of the Zakay passion for capturing and displaying nature's light with geodesic star inspired shapes. This collection of glass creations provides an ambience of feeling and timeless beauty. Our unique gallery specializes in contemporary glass sculptures and innovative lighting, inspired by geometry. Designer, Asaf Zakay, fashions his creations on what is known as the golden ratio: this ratio within nature appeals to the human sense of beauty and balance.

Each geometric creation offers a fascinating play of light and shadow during the day, reflecting mesmerizing geometric rainbow effects. Each sculpture is made with beveled glass, which acts as prisms in the sunlight, creating a magnificent light diffraction, providing a spectrum of colours. A Zakay Creation is the ultimate gift of discernment. These contemporary glass sculptures of timeless beauty enhance any space, whether it be a home, office or public domain. Make a statement with Geometrica glass sculptures in beveled glass, geometric patterns and dichroic hues.

Superb craftsmanship, unique designs and the use of the finest quality materials are the hallmarks of Zakay Glass Creations. Asaf Zakay, designer and glass artist, is also available for commissioned projects for private and public collections.

Please contact our office: samaya@zakayglasscreations.com or phone +61 2 6685 6225 for further inquiries.

PRODUCT INFORMATION

STANDS

Suspend your Geometrica glass sculpture from specially designed stands. Choose from The Pod design, made with mahogany wood or New Moon design made with stainless steel. See page 21 and 22 of our catalogue for the design and size that would best suit your environment.

STAINED GLASS TECHNIQUE

In our glass studio, we use the copper foil technique, which was established a century ago by Louis Comfort Tiffany.

GLASS SHAPE INFORMATION

GLASS SHAPE KEY	SHAPE TYPE	SIZE	SHORT EDGE	LONG EDGE
	EQUILATERAL TRIANGLE	SMALL	76mm	
	EQUILATERAL TRIANGLE	LARGE	102mm	
	ISOSCELES TRIANGLE	SMALL	51mm	89mm
	ISOSCELES TRIANGLE	LARGE	76mm	121mm
	DIAMOND	SMALL	51mm	102mm
	DIAMOND	LARGE	76mm	126mm
	SQUARE	SMALL	76mm	76mm
	SQUARE	LARGE	102mm	102mm
	PENTAGON	STANDARD	51mm	

TYPES OF GLASS WE USE

CLEAR SINGLE AND DOUBLE BEVELLED

This triangular piece of glass has a single or double angle surface cut. Bevels act as prisms in the sunlight creating an interesting colour diffraction which both highlights the glass work and provides a spectrum of colours which would ordinarily be absent in clear float glass.

CLEAR SINGLE BEVELLED

CLEAR DOUBLE BEVELLED

DICHROIC – GREY AND CLEAR

Dichroic glass is glass containing multiple micro-layers of metals or oxides which give the glass dichroic optical properties. The main characteristic of dichroic glass is that it has a particular transmitted colour and a completely different reflected colour, as certain wavelengths of light either pass through or are reflected. This causes an array of colour to be displayed. The colours shift depending on the angle of view.

DICHROIC GREY

DICHROIC CLEAR

ARIELGEOMETRICA

STAR TETRAHEDRON

Ariel is also commonly known as a star tetrahedron or merkaba in the world of geometry. Created by two interlocking tetrahedrons, a symbol of balance and unity.

VEGAGEOMETRICA

TREE OF LIFE

An elegant addition to a bedroom, over a dining room table or entrance. Vega, meaning stooping eagle is a symbol for the tree of life. One of the most important symbols in the Kabbalah. Each face created using diamond shaped dichroic glass.

SCORPIUSGEOMETRICA

GREAT STELLATED DODECAHEDRON

Based on the dodecahedron, this shape relates to the geometric principle of the phi ratio. The geometrical principles of the classical world can be seen in architecture, furniture and smaller functional objects. A stunningly simple sculpture that radiates the magic of the golden ratio.

TETRA GEOMETRICA

TETRA MATRIX

This design is the outcome of a discussion between designer Asaf Zakay and physicist Nassim Hamein. It is the intrinsic conceptual element of Mr Hamein's unified field theory, in which he describes the structure of the vacuum as a fractal geometry based on Platonic solids and Archimedean geometries.

FLOWER OF LIFE PENDANT

The Flower of Life symbol is considered to be sacred among many cultures in the world, both ancient and modern. Within this symbol can be found all the building blocks of the universe that we call the platonic solids. It can be used as a metaphor to illustrate the connectedness of all life and the spirit within the universe.

FLOWER OF LIFE AMETHYST

The Flower of Life symbol is considered to be sacred among many cultures in the world, both ancient and modern. Within this symbol can be found all the building blocks of the universe. It can be used as a metaphor to illustrate the connectedness of all life and the spirit within the universe. Amethyst has long been used to open the spiritual and psychic centers, making it one of the power stones. Amethyst also has the power to focus energy. Together, the amethyst and sacred symbol are very potent and work on a conscious and subconscious level to inspire the lives of those that wear them.

MERKABA TRIPLE SPHERE

The Merkaba with triple Prana sphere is a model that represents the energetic field that surrounds the human body while activating the Merkaba. The sphere represents the female and the straight lines of the Merkaba represent the male. Combined together, the Merkaba inside the sphere represents a perfect balance.

FLOWER OF LIFE PENDANT

The Flower of Life symbol is considered to be sacred among many cultures in the world, both ancient and modern. Within this symbol can be found all the building blocks of the universe that we call the platonic solids. It can be used as a metaphor to illustrate the connectedness of all life and the spirit within the universe.
